

Turn Around Don't Drown[®]

More deaths occur due to flooding each year than from any other thunderstorm or hurricane-related hazard. Many of these casualties are a result of careless or unsuspecting motorists who attempt to navigate flooded roads. FLASH and the National Weather Service now warn anyone who comes to a flooded roadway, ***“Turn Around...Don't Drown!”***[®]

Follow these safety rules:

- If flooding occurs, get to higher ground. Stay away from flood-prone areas, including dips, low spots, valleys, ditches, washes, etc.
- Avoid flooded areas or those with rapid water flow. Do not attempt to cross a flowing stream. It takes only six inches of fast flowing water to sweep you off your feet.
- Don't allow children to play near high water, storm drains or ditches. Hidden dangers could lie beneath the water.
- Flooded roads could have significant damage hidden by floodwaters. NEVER drive through floodwaters or on flooded roads. Water only two feet deep can float away most automobiles.
- Do not camp or park your vehicle along streams and washes, particularly when threatening conditions exist.
- Be especially cautious at night when it is harder to recognize flood dangers.
