

# Annual Tornado Watch Hours 2003-2014

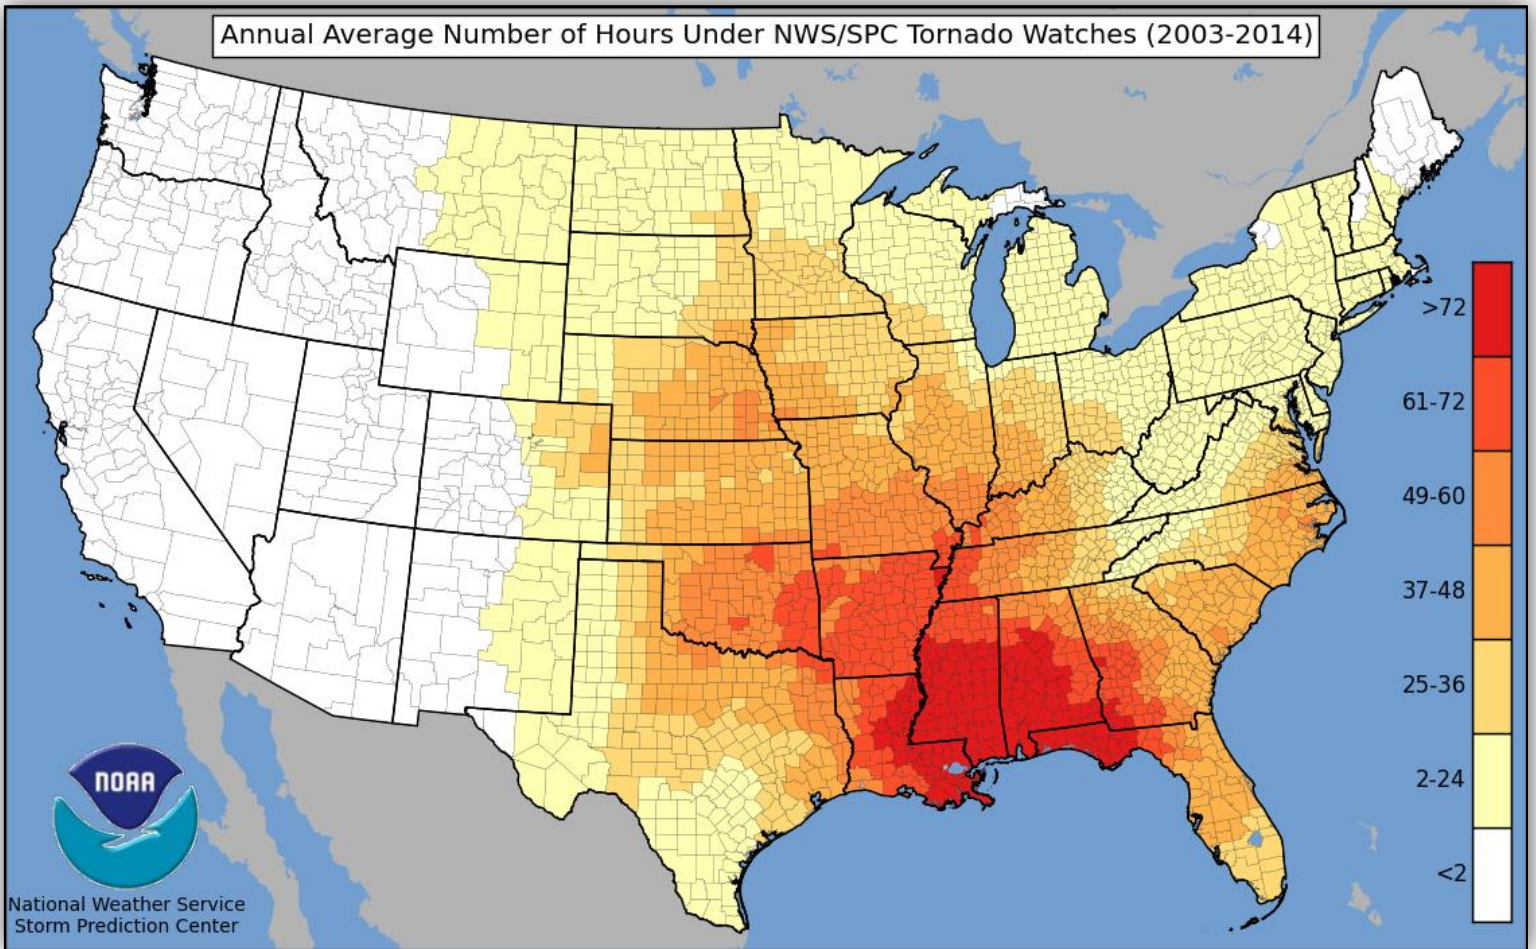

The analysis is based on data provided to the nonprofit Federal Alliance for Safe Homes ([FLASH](#))<sup>®</sup> by the NOAA/National Weather Service *Storm Prediction Center* in Norman, Oklahoma. The data is a compilation of annual averages of all tornado watch hours from 2003 through 2014 for counties in the continental United States and the District of Columbia.

\* As defined by the NOAA National Climate Data Center: "Although the boundaries of Tornado Alley are debatable (depending on which criteria you use—frequency, intensity, or events per unit area), the region from central Texas, northward to northern Iowa, and from central Kansas and Nebraska east to western Ohio is often collectively known as Tornado Alley." <http://www.ncdc.noaa.gov/climate-information/extreme-events/us-tornado-climatology/tornado-alley>

This table reflects the total average hours, average hours per year, and range of hours per county in any given year from 2003-2014 that have experienced a tornado watch. The table omits the six states (Arizona, Idaho, Nevada, Oregon, Utah, and Washington) without any tornado watches during the period.
